Innovative propane-nitrogen two-phase expander refrigeration cycle for energy-efficient and low-global warming potential LNG production

Muhammad Abdul Qyyum, Kinza Qadeer, Sanggyu Lee, Moonyong Lee

PII: S1359-4311(17)38155-3

DOI: <https://doi.org/10.1016/j.applthermaleng.2018.04.105>

Reference: ATE 12102

To appear in: *Applied Thermal Engineering*

Received Date: 25 December 2017

Revised Date: 18 April 2018

Accepted Date: 22 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Innovative propane-nitrogen two-phase expander refrigeration cycle for energy-efficient and low-global warming potential LNG production
