Towards uniform and fast rewarming for cryopreservation with electromagnetic resonance cavity: numerical simulation and experimental investigation

Jiayi Pan, Zhiqian Shu, Gang Zhao, Weiping Ding, Shen Ren, Praveen K. Sekar, Ji Peng, Ming Chen, Dayong Gao

PII: S1359-4311(17)38043-2
DOI: <https://doi.org/10.1016/j.applthermaleng.2018.05.015>
Reference: ATE 12154

To appear in: *Applied Thermal Engineering*

Received Date: 20 December 2017
Revised Date: 7 April 2018
Accepted Date: 6 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Towards uniform and fast rewarming for cryopreservation with electromagnetic
resonance cavity: numerical simulation and experimental investigation
