Determination of optimum operation conditions in an ultrasound assisted fibrous porous media drying process

Panpan Li, Zhenqian Chen, Lisha Sheng

PII: S1359-4311(18)31732-0
DOI: <https://doi.org/10.1016/j.applthermaleng.2018.04.081>
Reference: ATE 12078

To appear in: *Applied Thermal Engineering*

Received Date: 18 March 2018
Revised Date: 15 April 2018
Accepted Date: 16 April 2018

Please cite this article as: P. Li, Z. Chen, L. Sheng, Determination of optimum operation conditions in an ultrasound assisted fibrous porous media drying process, *Applied Thermal Engineering* (2018), doi: <https://doi.org/10.1016/j.applthermaleng.2018.04.081>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Determination of optimum operation conditions in an ultrasound assisted fibrous porous media drying process
