Research Paper

Modeling counter-flow particle heat exchangers for two-step solar thermochemical syngas production

Christoph P. Falter, Robert Pitz-Paal

PII: S1359-4311(17)30677-4

DOI: <https://doi.org/10.1016/j.applthermaleng.2017.12.087>

Reference: ATE 11608

To appear in: *Applied Thermal Engineering*

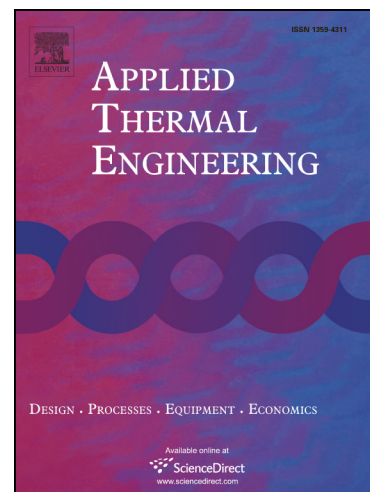

Received Date: 30 January 2017

Revised Date: 13 November 2017

Accepted Date: 23 December 2017

Please cite this article as: C.P. Falter, R. Pitz-Paal, Modeling counter-flow particle heat exchangers for two-step solar thermochemical syngas production, *Applied Thermal Engineering* (2017), doi: <https://doi.org/10.1016/j.applthermaleng.2017.12.087>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
