

Accepted Manuscript

Numerical Study of a Tangentially Fired Boiler for Reducing Steam Tube Overheating

Guangwu Tang, Bin Wu, Kurt Johnson, Albert Kirk, Dong Fu, Chenn Q. Zhou

PII: S1359-4311(16)30408-2

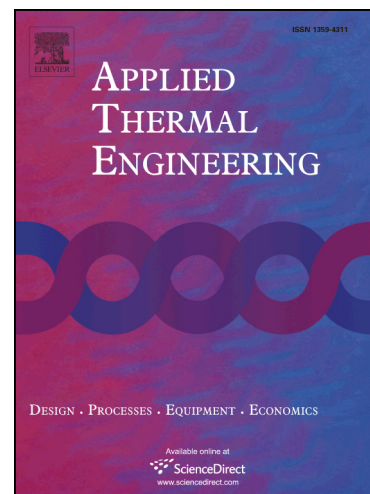

DOI: <http://dx.doi.org/10.1016/j.applthermaleng.2016.03.104>

Reference: ATE 7972

To appear in: *Applied Thermal Engineering*

Received Date: 8 November 2015

Accepted Date: 21 March 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Numerical Study of a Tangentially Fired Boiler for Reducing Steam Tube Overheating
