Hydrogen Rich Syngas Production from Oxy-Steam Gasification of a Lignite Coal – A Design and Optimization Study

Robert Mota, Gautham Krishnamoorthy, Oyebola Dada, Steven A. Benson

PII: S1359-4311(15)00641-9

DOI: [10.1016/j.applthermaleng.2015.06.081](https://doi.org/10.1016/j.applthermaleng.2015.06.081)

Reference: ATE 6775

To appear in: *Applied Thermal Engineering*

Received Date: 9 March 2015

Revised Date: 21 May 2015

Accepted Date: 21 June 2015

Please cite this article as: R. Mota, G. Krishnamoorthy, O. Dada, S.A Benson, Hydrogen Rich Syngas Production from Oxy-Steam Gasification of a Lignite Coal – A Design and Optimization Study, *Applied Thermal Engineering* (2015), doi: 10.1016/j.applthermaleng.2015.06.081.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydrogen Rich Syngas Production from Oxy-Steam Gasification of a Lignite Coal – A Design and Optimization Study**Robert Mota, Gautham Krishnamoorthy,* Oyebola Dada, Steven A Benson**

Department of Chemical Engineering, Harrington Hall Room 323, 241 Centennial Drive, University of North Dakota, Grand Forks, ND 58202-7101, USA
