Effect of viscoelasticity on stability of liquid curtain

Alireza Mohammad Karim , Wieslaw J. Suszynski ,
William B. Griffith , Saswati Pujari , Lorraine F. Francis ,
Marcio S. Carvalho

PII: S0377-0257(17)30555-4
DOI: [10.1016/j.jnnfm.2018.03.019](https://doi.org/10.1016/j.jnnfm.2018.03.019)
Reference: JNNFM 3998

To appear in: *Journal of Non-Newtonian Fluid Mechanics*

Received date: 8 December 2017
Revised date: 28 March 2018
Accepted date: 30 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- High speed visualization of breakup process of viscoelastic liquid curtains.
- Retraction speed of a rim on a viscoelastic liquid sheet.
- Critical Weber number for curtain breakup as a function of Trouton ratio.
- Mechanisms by which liquid viscoelasticity stabilizes a liquid curtain.
