On the pressure-driven flow of suspensions: particle migration in shear sensitive liquids

R.B. Rebouças, I.R. Siqueira, P.R. de Souza Mendes, M.S. Carvalho

PII: S0377-0257(16)30066-0
DOI: [10.1016/j.jnnfm.2016.06.001](https://doi.org/10.1016/j.jnnfm.2016.06.001)
Reference: JNNFM 3795

To appear in: *Journal of Non-Newtonian Fluid Mechanics*

Received date: 18 December 2015
Revised date: 15 April 2016
Accepted date: 1 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Suspension flow taking into account particle migration and shear-thinning effects;
- Pressure drop in fully developed flow for the different viscosity models used;
- Shear-induced diffusion coefficients can be estimated by pressure drop measurements.
