

Annual Index to Vols. 30–35, 2017

Volume 30

• Reviews

Magnetic nanoparticles for environmental and biomedical applications:
A review
L. Mohammed, H.G. Gomaa, D. Ragab and J. Zhu

1–14

Advances in scalable gas-phase manufacturing and processing
of nanostructured solids: A review
*S. Salameh, J. Gómez-Hernández, A. Goulas, H. Van Bui and
J.R. van Ommen*

15–39

• Invited articles

The contribution of small leaks in a baghouse filter to dust emission
in the PM_{2.5} range—A system approach
O. Kurtz, J. Meyer and G. Kasper

40–52

Validation of surface coating with nanoparticles to improve the
flowability of fine cohesive powders
X. Zhu, Q. Zhang, C. Huang, Y. Wang, C. Yang and F. Wei

53–61

• Articles

Lattice Boltzmann method and RANS approach for simulation of
turbulent flows and particle transport and deposition
H. Sajjadi, M. Salmanzadeh, G. Ahmadi and S. Jafari

62–72

Swelling and diffusion model of a hydrophilic film coating on
controlled-release urea particles
L. Yang, D. An, T.-J. Wang, C. Kan and Y. Jin

73–82

An experimental investigation into modeling solids friction for fluidized
dense-phase pneumatic transport of powders
G. Setia, S.S. Mallick, R. Pan and P.W. Wypych

83–91

The effect of gas phase polydimethylsiloxane surface treatment of
metallic aluminum particles: Surface characterization and flow behavior
B. Ludwig and J.L. Gray

92–101

Minimising the spread of residence-time distribution for flat and
heaped powders in a wedge-shaped planar hopper
L. Fullard and C. Davies

102–110

An acetic acid refluxing-electrochemistry combined strategy to activate
supported-platinum electrocatalysts
Y. Feng, J. Pan, H. Liu and J. Yang

111–117

Advanced microemulsion synthesis and characterization of
wollastonite (CaSiO₃)/polystyrene one-dimensional nanorods
with core-shell structures
A. Chatterjee, P. Khobragade, S. Mishra and J. Naik

118–128

Composition and morphology of the thermal decomposition products
of 3Mg(OH)₂·MgCl₂·8H₂O nanowires
B. Yu and L. Xiang

129–134

Polycaprolactone/mesoporous silica MCM-41 composites prepared
by in situ polymerization
L. Lopez-Figueras, N. Navascues and S. Irusta

135–143

Preparation and electrochemical performance of carbon-coated
LiFePO₄/LiMnPO₄-positive material for a Li-ion battery
Q. Tan, B. Yan, Y. Xu, Y. Chen and J. Yang

144–150

Red-blood-cell-shaped chitosan microparticles prepared by
electrospraying
X. Ju, X. Wang, Z. Liu, R. Xie, W. Wang and L. Chu

151–157

Antibacterial properties of copper-substituted cobalt ferrite nanoparticles
synthesized by co-precipitation method
A. Samavati and A.F. Ismail

158–163

Volume 31

• Review

An update on electrostatic powder coating for pharmaceuticals
Q. Yang, Y. Ma, J. Zhu, K. Chow and K. Shi

1–7

• Articles

A dynamic two-zone model of continuous fluidized bed layering
granulation with internal product classification
*C. Neugebauer, S. Palis, A. Bück, E. Tsotsas, S. Heinrich and
A. Kienle*

8–14

CFD–DEM simulation of turbulence modulation in horizontal
pneumatic conveying
M. Ebrahimi and M. Crapper

15–24

CFD study: Effect of pulsating flow on gas–solid hydrodynamics
in FCC riser
M.T. Shah, R.P. Utikar and V.K. Pareek

25–34

A novel coated-particle design and fluidized-bed chemical vapor
deposition preparation method for fuel-element identification in a
nuclear reactor
R. Liu, M. Liu, Y. Shao, X. Chen, J. Ma and B. Liu

35–41

Numerical comparison of two modes of gas-solid riser operation:
Fluid catalytic cracking vs CFB combustor
Y. Mei, M. Zhao, B. Lu, S. Chen and W. Wang

42–48

Discrete element method for high-temperature spread in compacted
powder systems
S. Wang and Z. Zheng

49–53

An investigation of the effect of ammonium sulfate addition on
compound fertilizer granulation
B. Xue, H. Huang, M. Mao and E. Liu

54–58

Detailed parametric design methodology for hydrodynamics of
liquid–solid circulating fluidized bed using design of experiments
R.R. Palkar and V. Shilapuram

59–68

Glidant effect of hydrophobic and hydrophilic nanosilica on a cohesive
powder: Comparison of different flow characterization techniques
A.F.B. Ruzaidi, U.K. Mandal and B. Chatterjee

69–79

A Markov chain model of mixing kinetics for ternary mixture of
dissimilar particulate solids
V. Mizonov, I. Balagurov, H. Berthiaux and C. Gatumel

80–86

Scale-up of a high shear wet granulation process using a nucleation regime map approach <i>G. Luo, B. Xu, Y. Zhang, X. Cui, J. Li, X. Shi and Y. Qiao</i>	87–94	Bubbling behavior of cohesive particles in a two-dimensional fluidized bed with immersed tubes <i>J. Ma, D. Liu and X. Chen</i>	152–160
Simulations of vertical jet penetration using a filtered two-fluid model in a gas–solid fluidized bed <i>S. Wang, B. Shao, X. Li, J. Zhao, L. Liu, Y. Liu, Y. Liu and Q. Dong</i>	95–104	Six-day measurement of size-resolved indoor fluorescent bioaerosols of outdoor origin in an office <i>Y. Xie, O.A. Fajardo, W. Yan, B. Zhao and J. Jiang</i>	161–169
Hydrodynamic modeling strategy for dense to dilute gas–solid fluidized beds <i>S.A. Kia and J. Aminian</i>	105–116	Numerical simulation of a dense solid particle flow inside a cyclone separator using the hybrid Euler–Lagrange approach <i>P. Kozolub, A. Klimanek, R.A. Bialecki and W.P. Adamczyk</i>	170–180
Simulating orthokinetic heterocoagulation and cluster growth in destabilizing suspensions <i>F. Bülow, H. Nirschl and W. Dörfler</i>	117–128	Emission of organic carbon, elemental carbon and water-soluble ions from crop straw burning under flaming and smoldering conditions <i>L. Hong, G. Liu, L. Zhou, J. Li, H. Xu and D. Wu</i>	181–190
Macro- and micromechanical evaluation of cyclic simple shear test by discrete element method <i>M. Asadzadeh and A. Soroush</i>	129–139	Modeling particle sedimentation in viscous fluids with a coupled immersed boundary method and discrete element method <i>S.M. Derakhshani, D.L. Schott and G. Lodewijks</i>	191–199
Numerical simulation of polygonal particles moving in incompressible viscous fluids <i>X. Fu, Z. Yao and X. Zhang</i>	140–151	A novel hybrid solid-like fluid-like (SLFL) method for the simulation of dry granular flows <i>A. Eslamian and M. Khayat</i>	200–219

Volume 32

• Articles

Determination of particle exchange rates at over-flow weirs in horizontal fluidised beds by particle tracking velocimetry <i>K. Meyer, A. Bück and E. Tsotsas</i>	1–9	Discrete element method study of shear-driven granular segregation in a slowly rotating horizontal drum <i>R. Chand, S.V. Muniandy, C.S. Wong and J. Singh</i>	89–94
A comparison between powder flow property testers <i>H. Salehi, D. Barletta and M. Poletto</i>	10–20	Chemical characteristics and Pb isotopic compositions of PM _{2.5} in Nanchang, China <i>Y. Zhao, R. Yu, G. Hu, X. Lin and X. Liu</i>	95–102
Discrete element modeling of the effect of particle size distribution on the small strain stiffness of granular soils <i>X. Gu, L. Lu and J. Qian</i>	21–29	Numerical study of particle motion near a charged collector <i>Z. Zuo, J. Wang, Y. Huo and R. Xu</i>	103–111
Numerical analysis of residence time distribution of solids in a bubbling fluidized bed based on the modified structure-based drag model <i>Z. Zou, Y. Zhao, H. Zhao, H. Li, Q. Zhu, Z. Xie and Y. Li</i>	30–38	Numerical simulation of the sticking process of glass-microparticles to a flat wall to represent pollutant-particles treatment in a multi-channel cyclone <i>R. Jasevičius, H. Kruggel-Emden and P. Baltrėnas</i>	112–131
Hydrodynamics characterization of a choanoid fluidized bed bioreactor used in the bioartificial liver system: Fully resolved simulation with a fictitious domain method <i>J. Sun, Z. Yu and S. Ye</i>	39–48	Mixing and segregation of solid particles in a conical spouted bed: Effect of particle size and density <i>M. Kiani, M.R. Rahimi, S.H. Hosseini and G. Ahmadi</i>	132–140
Effect of aspect ratio on triaxial compression of multi-sphere ellipsoid assemblies simulated using a discrete element method <i>J. Gong and J. Liu</i>	49–62	Bonded-particle model calibration using response surface methodology <i>S. Chehreghani, M. Noaparast, B. Rezaei and S.Z. Shafaei</i>	141–152
Analysis of gas–solid flow and shaft-injected gas distribution in an oxygen blast furnace using a discrete element method and computational fluid dynamics coupled model <i>Z. Dong, J. Wang, H. Zuo, X. She and Q. Xue</i>	63–72	Optimal location of a particulate matter sampling head outside an unmanned aerial vehicle <i>J. Zhang, Y. Ji, J. Zhao and J. Zhao</i>	153–159
Disordered packing density of binary and polydisperse mixtures of curved spherocylinders <i>L. Meng and S. Li</i>	73–81	Interaction between Weibull parameters and mechanical strength reliability of industrial-scale water gas shift catalysts <i>M. Zakeri, A. Samimi, M.S. Afarani and A. Salehirdad</i>	160–166
Transient parameter analysis of pneumatic conveying of fine particles for predicting the change of mode of flow <i>Shijo J.S. and N. Behera</i>	82–88	Kinematics and dynamics of a particle on a non-simple harmonic vibrating screen <i>L. Wang, Z. Ding, S. Meng, H. Zhao and H. Song</i>	167–177
		Numerical analysis of frictional behavior of dense gas–solid systems <i>E. Ghadirian and H. Arastoopour</i>	178–190
