Title: State Diagram of Crystallized Date-Syrup: Freezing Curve, Glass Transition, Crystals-Melting and Maximal-Freeze-Concentration Condition

Authors: Kutaila Abbas Al-Farsi, Nasser Abdullah Al-Habsi, Mohammad Shafiur Rahman

PII: S0040-6031(18)30347-2
DOI: <https://doi.org/10.1016/j.tca.2018.06.003>
Reference: TCA 78016

To appear in: *Thermochemica Acta*

Received date: 11-1-2018
Revised date: 4-6-2018
Accepted date: 5-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

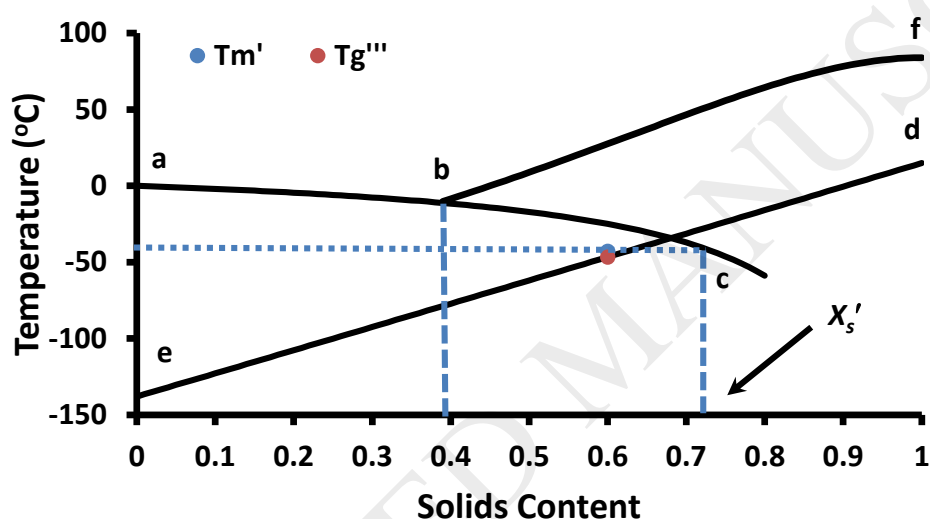

State Diagram of Crystallized Date-Syrup: Freezing Curve, Glass Transition, Crystals-Melting and Maximal-Freeze-Concentration Condition

Graphical Abstract

Highlights

- State diagram of crystallized date-syrup was developed using thermal analysis
- Freezing curve, glass transition, and sugar crystal-melting curves were modeled by theoretical thermodynamic equations
- Maximal-freeze-concentration was determined to estimate end point of freezing and un-freezable water content
- Eutectic point was determined from the intersection of the freezing curve and solute crystallized line
