Biological acetate production from carbon dioxide by *Acetobacterium woodii* and *Clostridium ljungdahlii*: The effect of cell immobilization

Hai-Hsuan Cheng, Jyun-Cyuan Syu, Shih-Yuan Tien, Liang-Ming Whang

PII: S0960-8524(18)30591-1
DOI: <https://doi.org/10.1016/j.biortech.2018.04.069>
Reference: BITE 19849

To appear in: *Bioresource Technology*

Received Date: 27 February 2018
Revised Date: 16 April 2018
Accepted Date: 17 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Biological acetate production from carbon dioxide by *Acetobacterium woodii* and

Clostridium ljungdahlii: The effect of cell immobilization

Hai-Hsuan Cheng^a, Jyun-Cyuan Syu^a, Shih-Yuan Tien^a, and Liang-Ming Whang^{a,b,c,*}
