

Accepted Manuscript

Simultaneous saccharification and aerobic fermentation of high titer cellulosic citric acid by filamentous fungus *Aspergillus niger*

Weiliang Hou, Jie Bao

PII: S0960-8524(18)30011-7
DOI: <https://doi.org/10.1016/j.biortech.2018.01.011>
Reference: BITE 19368

To appear in: *Bioresource Technology*

Received Date: 15 November 2017
Revised Date: 30 December 2017
Accepted Date: 2 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original Research Paper manuscript submitted to Bioresource Technology

Simultaneous saccharification and aerobic fermentation of high titer cellulosic citric acid by filamentous fungus *Aspergillus niger*
