Fate of antibiotic resistance genes and metal resistance genes during thermophilic aerobic digestion of sewage sludge

Hyun Min Jang, Jangwoo Lee, Young Beom Kim, Jong Hun Jeon, Jingyeong Shin, Mee-Rye Park, Young Mo Kim

PII: S0960-8524(17)31902-8

DOI: <https://doi.org/10.1016/j.biortech.2017.10.073>

Reference: BITE 19114

To appear in: *Bioresource Technology*

Received Date: 28 August 2017

Revised Date: 13 October 2017

Accepted Date: 18 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Fate of antibiotic resistance genes and metal resistance genes during
thermophilic aerobic digestion of sewage sludge**

Abbreviations: absolute abundance (AA), aerobic digestion (AD), anaerobic digestion (AnD),
antibiotic resistance genes (ARGs), detrended correspondence analysis (DCA), class 1
integron-integrase gene (*intI1*), mobile genetic elements (MGEs), metal resistance genes
(MRGs), operational taxonomic unit (OTU), quantitative PCR (qPCR), relative abundance
(RA), redundancy analysis (RDA), soluble COD (SCOD), total COD (TCOD), thermophilic
aerobic digestion (TAD), total solids (TS), volatile solids (VS), wastewater treatment plant
(WWTP)
