Recirculation of gas emissions to achieve advanced denitrification of the effluent from the anaerobic treatment of domestic wastewater

L. Pelaz, A. Gómez, G. Garralón, A. Letona, M. Fdz-Polanco

PII: S0960-8524(17)32108-9
DOI: <https://doi.org/10.1016/j.biortech.2017.11.104>
Reference: BITE 19254

To appear in: *Bioresource Technology*

Received Date: 25 September 2017
Revised Date: 27 November 2017
Accepted Date: 29 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Recirculation of gas emissions to achieve advanced**
2 **denitrification of the effluent from the anaerobic treatment**
3 **of domestic wastewater**
