Effects of sulphur on the performance of an anaerobic membrane bioreactor:
Biological stability, trace organic contaminant removal, and membrane fouling

Xiaoye Song, Wenhai Luo, James McDonald, Stuart J. Khan, Faisal I. Hai,
Wenshan Guo, Hao H. Ngo, Long D. Nghiem

PII: S0960-8524(17)31995-8
DOI: <https://doi.org/10.1016/j.biortech.2017.11.021>
Reference: BITE 19171

To appear in: *Bioresource Technology*

Received Date: 12 September 2017
Revised Date: 7 November 2017
Accepted Date: 8 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effects of sulphur on the performance of an anaerobic membrane
bioreactor: Biological stability, trace organic contaminant removal,
and membrane fouling**

Revised manuscript submitted to *Bioresource Technology*
