

## Accepted Manuscript

Continuous hydrogen and methane production from *Agave tequilana* bagasse hydrolysate by sequential process to maximize energy recovery efficiency

Virginia Montiel Corona, Elías Razo-Flores

PII: S0960-8524(17)31851-5  
DOI: <https://doi.org/10.1016/j.biortech.2017.10.032>  
Reference: BITE 19073

To appear in: *Bioresource Technology*

Received Date: 15 August 2017  
Revised Date: 6 October 2017  
Accepted Date: 7 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Revised**

**Continuous hydrogen and methane production from *Agave tequilana*  
bagasse hydrolysate by sequential process to maximize energy recovery  
efficiency**
