Boosting dark fermentation with co-cultures of extreme thermophiles for biohythane production from garden waste

Angela A Abreu, Fábio Tavares, Maria Madalena Alves, Maria Alcina Pereira

PII: S0960-8524(16)31075-6
DOI: <http://dx.doi.org/10.1016/j.biortech.2016.07.096>
Reference: BITE 16858

To appear in: *Bioresource Technology*

Received Date: 19 May 2016
Revised Date: 21 July 2016
Accepted Date: 22 July 2016

Please cite this article as: Abreu, A.A., Tavares, F., Alves, M.M., Pereira, M.A., Boosting dark fermentation with co-cultures of extreme thermophiles for biohythane production from garden waste, *Bioresource Technology* (2016), doi: <http://dx.doi.org/10.1016/j.biortech.2016.07.096>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Boosting dark fermentation with co-cultures of extreme thermophiles for**
2 **biohythane production from garden waste**
