Influence of feedstock on the copper removal capacity of waste-derived biochars

Diego Arán, Juan Antelo, Sarah Fiol, Felipe Macías

PII: S0960-8524(16)30530-2

DOI: <http://dx.doi.org/10.1016/j.biortech.2016.04.043>

Reference: BITE 16402

To appear in: *Bioresource Technology*

Received Date: 12 February 2016

Revised Date: 7 April 2016

Accepted Date: 10 April 2016

Please cite this article as: Arán, D., Antelo, J., Fiol, S., Macías, F., Influence of feedstock on the copper removal capacity of waste-derived biochars, *Bioresource Technology* (2016), doi: <http://dx.doi.org/10.1016/j.biortech.2016.04.043>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Influence of feedstock on the copper removal capacity of waste-derived**

2 **biochars**
