Iron-nitrogen-activated carbon as cathode catalyst to improve the power generation of single-chamber air-cathode microbial fuel cells

Yajun Pan, Xiaoping Mo, Kexun Li, Liangtao Pu, Di Liu, Tingting Yang

PII: S0960-8524(16)30088-8
DOI: <http://dx.doi.org/10.1016/j.biortech.2016.01.112>
Reference: BITE 16023

To appear in: *Bioresource Technology*

Received Date: 28 November 2015
Revised Date: 28 January 2016
Accepted Date: 29 January 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Iron-nitrogen-activated carbon as cathode catalyst to improve the power generation of single-chamber air-cathode microbial fuel cells
