Application of high-content image analysis for quantitatively estimating lipid accumulation in oleaginous yeasts with potential for use in biodiesel production

Aurélie Capus, Marianne Monnerat, Luiz Carlos Ribeiro, Wanderley de Souza, Juliana Lopes Martins, Celso Sant'Anna

PII: S0960-8524(15)01697-1
DOI: <http://dx.doi.org/10.1016/j.biortech.2015.12.067>
Reference: BITE 15888

To appear in: *Bioresource Technology*

Received Date: 19 October 2015
Revised Date: 19 December 2015
Accepted Date: 21 December 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Application of high-content image analysis for quantitatively estimating lipid accumulation in oleaginous yeasts with potential for use in biodiesel production
