

Accepted Manuscript

Continuous harvesting of microalgae by new microfluidic technology for particle separation

Birgitte K. Hønsvall, Dag Altin, Lucy J. Robertson

PII: S0960-8524(15)01449-2

DOI: <http://dx.doi.org/10.1016/j.biortech.2015.10.046>

Reference: BITE 15671

To appear in: *Bioresource Technology*

Received Date: 24 August 2015

Revised Date: 8 October 2015

Accepted Date: 11 October 2015

Please cite this article as: Hønsvall, B.K., Altin, D., Robertson, L.J., Continuous harvesting of microalgae by new microfluidic technology for particle separation, *Bioresource Technology* (2015), doi: <http://dx.doi.org/10.1016/j.biortech.2015.10.046>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Continuous harvesting of microalgae by new microfluidic technology for particle separation
