Case Study

Fatty acid metabolism and population dynamics in a wet biowaste digester during re-start after revision

Christoph Moertelmaier, Chaoran Li, Josef Winter, Claudia Gallert

PII: S0960-8524(14)00793-7

DOI: <http://dx.doi.org/10.1016/j.biortech.2014.05.085>

Reference: BITE 13493

To appear in: *Bioresource Technology*

Received Date: 21 March 2014

Revised Date: 25 March 2014

Accepted Date: 22 May 2014

Please cite this article as: Moertelmaier, C., Li, C., Winter, J., Gallert, C., Fatty acid metabolism and population dynamics in a wet biowaste digester during re-start after revision, *Bioresource Technology* (2014), doi: <http://dx.doi.org/10.1016/j.biortech.2014.05.085>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fatty acid metabolism and population dynamics in a wet biowaste digester during re-start after revision

HIGHLIGHTS

- Wet anaerobic digestion of biowaste
- Adaptive substrate supply during re-start
- Fatty acid formation and degradation
- Population dynamics during metabolic stabilization
