

## Accepted Manuscript

Continuous synthesis of lactulose in an enzymatic membrane reactor reduces lactulose secondary hydrolysis

Azis Boing Sitanggang, Anja Drews, Matthias Kraume

PII: S0960-8524(14)00842-6  
DOI: <http://dx.doi.org/10.1016/j.biortech.2014.05.124>  
Reference: BITE 13532

To appear in: *Bioresource Technology*

Received Date: 31 March 2014  
Revised Date: 30 May 2014  
Accepted Date: 31 May 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
