

Accepted Manuscript

Influence of feedstock chemical composition on product formation and characteristics derived from the hydrothermal carbonization of mixed feedstocks

Xiaowei Lu, Nicole D. Berge

PII: S0960-8524(14)00674-9

DOI: <http://dx.doi.org/10.1016/j.biortech.2014.05.015>

Reference: BITE 13423

To appear in: *Bioresource Technology*

Received Date: 14 January 2014

Revised Date: 4 May 2014

Accepted Date: 5 May 2014

Please cite this article as: Lu, X., Berge, N.D., Influence of feedstock chemical composition on product formation and characteristics derived from the hydrothermal carbonization of mixed feedstocks, *Bioresource Technology* (2014), doi: <http://dx.doi.org/10.1016/j.biortech.2014.05.015>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
