Exploiting composting biodiversity: study of the persistent and biotechnologically relevant microorganisms from lignocellulose-based composting

Macarena Jurado, María J. López, Francisca Suárez-Estrella, María C. Vargas-García, Juan A. López-González, Joaquín Moreno

PII: S0960-8524(14)00450-7
DOI: <http://dx.doi.org/10.1016/j.biortech.2014.03.145>
Reference: BITE 13276

To appear in: *Bioresource Technology*

Received Date: 17 January 2014
Revised Date: 21 March 2014
Accepted Date: 26 March 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Exploiting composting biodiversity: study of the persistent and biotechnologically relevant microorganisms from lignocellulose-based composting
