Title: Modelling of intensified catalyst-coated plate-fin heat exchanger reactors: Reactive fin efficiencies and by-pass factor based on coupling between reaction, heat and mass transfer

Authors: Jean-Patrick Barbé, Enrique Gomez, Jean-Marc Commenge, Matthieu Flin, Solène Valentin, Marc Wagner, Laurent Falk

PII: S0255-2701(17)31272-2
DOI: <https://doi.org/10.1016/j.cep.2018.05.021>
Reference: CEP 7299

To appear in: *Chemical Engineering and Processing*

Received date: 15-12-2017
Revised date: 23-4-2018
Accepted date: 30-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Modelling of intensified catalyst-coated plate-fin heat exchanger reactors: Reactive fin efficiencies and by-pass factor based on coupling between reaction, heat and mass transfer
