

Accepted Manuscript

Title: External mass transfer in a laser sintered structured reactor for continuous hydrogenation of alkynes

Authors: Sergio Vernuccio, David Dempfle, Roman Goy, Jonathan Medlock, Philipp Rudolf von Rohr

PII: S0255-2701(17)30902-9
DOI: <https://doi.org/10.1016/j.cep.2018.02.005>
Reference: CEP 7187

To appear in: *Chemical Engineering and Processing*

Received date: 7-9-2017
Revised date: 28-1-2018
Accepted date: 6-2-2018

Please cite this article as: Sergio Vernuccio, David Dempfle, Roman Goy, Jonathan Medlock, Philipp Rudolf von Rohr, External mass transfer in a laser sintered structured reactor for continuous hydrogenation of alkynes, *Chemical Engineering and Processing* <https://doi.org/10.1016/j.cep.2018.02.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

External mass transfer in a laser sintered structured reactor for continuous hydrogenation of alkynes

Sergio Vernuccio,^{,†} David Dempfle,[†] Roman Goy,[‡] Jonathan Medlock[‡],*

Philipp Rudolf von Rohr[†]
