Title: Process Intensification of Copper Chromite (CuCr_2O_4) Nanoparticle Production Using Continuous Flow Microreactor

Author: Sumanth Appalakutti Shirish Sonawane Bharat A. Bhanvase Vikas Mittal Muthupandian Ashokkumar

PII: S0255-2701(15)00002-1
DOI: <http://dx.doi.org/doi:10.1016/j.cep.2014.12.012>
Reference: CEP 6524

To appear in: *Chemical Engineering and Processing*

Received date: 26-3-2014
Revised date: 22-12-2014
Accepted date: 31-12-2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Process Intensification of Copper Chromite (CuCr_2O_4) Nanoparticle Production Using Continuous Flow Microreactor

Highlights

- Continuous flow microreactor for synthesis of copper chromite nanoparticles at low temperature.
- Lesser particle size of copper chromite nanoparticles compared to batch process.
- Effect of different parameters on particle size of copper chromite investigated in microreactor.
