CEXP: Secure and verifiable outsourcing of composite modular exponentiation with single untrusted server

Shuai Li, Longxia Huang, Anmin Fu, John Yearwood

PII: S2352-8648(17)30077-9

DOI: 10.1016/j.dcan.2017.05.001

Reference: DCAN 84

To appear in: *Digital Communications and Networks*

Received Date: 20 February 2017

Revised Date: 19 April 2017

Accepted Date: 3 May 2017

Please cite this article as: S. Li, L. Huang, A. Fu, J. Yearwood, CEXP: Secure and verifiable outsourcing of composite modular exponentiation with single untrusted server, *Digital Communications and Networks* (2017), doi: 10.1016/j.dcan.2017.05.001.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Shuai Li is currently a M.S. student in School of Computer Science and Engineering, Nanjing University of Science and Technology, China. He received his B.S. degree in Information and Computing Science from Northeast Forestry University, China, in 2015. His research interest includes cloud computing.

Longxia Huang is currently a Ph.D. student in School of Computer Science and Engineering, Nanjing University of Science and Technology, China. Her research interests include privacy protection and public auditing in cloud storage.

Anmin Fu is currently associate professor of Nanjing University of Science and Technology, China. He received his B.S. degree in Communication Engineering from Lanzhou University of Technology, China, in 2005. He received his M.S. and Ph.D. degrees in Cryptography and Information Security from Xidian University in 2008 and 2011, respectively. His research interests include cryptography and network security.

John Yearwood is currently a professor Deakin University, Australia. He received his B.S degree from Monash University in 1975 and M.S degree from University of Sydney in 1977. He received his PhD from Royal Melbourne Institute of Technology in 1988. His research interests include data mining, computational intelligence and decision science.
