This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A ranking method based on DEA and PROMETHEE II (A rank based on DEA & PR. II)

Authors: Maryam Bagherikahvarin: mbagheri@ulb.ac.be, Yves De Smet: yves.de.smet@ulb.ac.be

Corresponding Author: Maryam Bagherikahvarin, mbagheri@ulb.ac.be

Address: CoDE-SMG unit, Computer and Decision Engineering department, École polytechnique de Bruxelles, Université libre de Bruxelles, Boulevard du Triomphe CP 210-01, 1050 Bruxelles, Brussels, Belgium, tel: 0032 2 650 59 56, fax: 0032 2 650 59 70

Highlights

- An extended weight restricted DEA model is proposed.
- The Weight Stability Intervals of PROMETHEE II are applied to restrict weights of an extended DEA model.
- The DEA discrimination power is increased.
