Title: A flexible sensing system capable of sensations imitation and motion monitoring with reliable encapsulation

Authors: Menglu Li, Lei Zheng, Tianbai Xu, Hualei Wo, Umar Farooq, Weiqiang Tan, Changqian Bao, Xiaozhi Wang, Shurong Dong, Wei Guo, Jikui Luo, Jong Min Kim

PII: S0924-4247(17)31699-0
DOI: <https://doi.org/10.1016/j.sna.2018.06.023>
Reference: SNA 10828

To appear in: *Sensors and Actuators A*

Received date: 19-9-2017
Revised date: 5-6-2018
Accepted date: 9-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A flexible sensing system capable of sensations imitation and motion monitoring with reliable encapsulation
