

Accepted Manuscript

Title: A bi-stable horizontal diamagnetic levitation based low frequency vibration energy harvester

Authors: S. Palagummi, F.G. Yuan

PII: S0924-4247(17)31871-X
DOI: <https://doi.org/10.1016/j.sna.2018.07.001>
Reference: SNA 10866

To appear in: *Sensors and Actuators A*

Received date: 26-11-2017
Revised date: 15-5-2018
Accepted date: 1-7-2018

Please cite this article as: Palagummi S, Yuan FG, A bi-stable horizontal diamagnetic levitation based low frequency vibration energy harvester, *Sensors and Actuators: A. Physical* (2018), <https://doi.org/10.1016/j.sna.2018.07.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A bi-stable horizontal diamagnetic levitation based low frequency vibration energy harvester
