Title: ThanFractal theory study and SERS effect of centimeter level of copper nanobranched detectors by solid-state ionics method

Authors: Dapeng Xu, Jing Dong, Song Zhang, Jian Chen

PII: S0924-4247(17)31862-9
DOI: <https://doi.org/10.1016/j.sna.2017.12.046>
Reference: SNA 10533

To appear in: *Sensors and Actuators A*

Received date: 19-10-2017
Revised date: 5-12-2017
Accepted date: 19-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
