#### Accepted Manuscript

Title: Controlled concentration and transportation of nanoparticles at the interface between a plain substrate and droplet

Authors: Xiaomin Qi, Qiang Tang, Pengzhan Liu, Igor V. Minin, Oleg V. Minin, Junhui Hu

PII: S0925-4005(18)31425-4

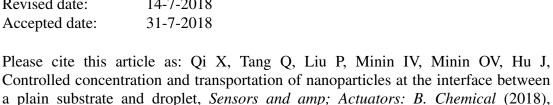

DOI: https://doi.org/10.1016/j.snb.2018.07.177

Reference: SNB 25146

To appear in: Sensors and Actuators B

Received date: 6-3-2018 Revised date: 14-7-2018 Accepted date:

https://doi.org/10.1016/j.snb.2018.07.177

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

#### Highlights

- NPs are concentrated around any selected point at droplet/solid interface.
- The concentrated NPs can be transported stably through an arbitrary path.
- The concentration and transportation are implemented by one single device.
- The manipulations are based on the whirlpool generated by
