

## Accepted Manuscript

Title: A novel NIR probe for detection of viscosity in cellular lipid droplets, zebra fishes and living mice

Authors: Rui Guo, Junling Yin, Yanyan Ma, Guanghan Li, Qiuhan Wang, Weiying Lin

PII: S0925-4005(18)30931-6  
DOI: <https://doi.org/10.1016/j.snb.2018.05.055>  
Reference: SNB 24711

To appear in: *Sensors and Actuators B*

Received date: 13-2-2018  
Revised date: 6-5-2018  
Accepted date: 8-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## A novel NIR probe for detection of viscosity in cellular lipid droplets, zebra fishes and living mice

### Graphic content entry

A novel near-infrared(NIR) fluorescent probe **NLV-1** suitable for measuring the viscosity changes in lipid droplets in living cells, zebra fishes and living mice was engineered.
