Title: Electroanalysis moves towards paper-based printed electronics: carbon black nanomodified inkjet-printed sensor for ascorbic acid detection as a case study

Authors: Stefano Cinti, Noemi Colozza, Iliaria Cacciotti, Danila Moscone, Maxim Polomoshnov, Enrico Sowade, Reinhard R. Baumann, Fabiana Arduini

PII: S0925-4005(18)30484-2
DOI: <https://doi.org/10.1016/j.snb.2018.03.006>
Reference: SNB 24291

To appear in: *Sensors and Actuators B*

Received date: 28-12-2017
Revised date: 12-2-2018
Accepted date: 1-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Electroanalysis moves towards paper-based printed electronics: carbon black nanomodified inkjet-printed sensor for ascorbic acid detection as a case study
