This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Heterobimetallic Ru-Os complexes function as multichannel sensors for selected anions by taking profit of metal-ligand interaction

Graphical abstract

Heterobimetallic Ru-Os complexes can detect and discriminate cyanide and thiocyanide ions in water through multiple optical channels.
