Title: Highly selective and safe '*in vitro*' detection of biologically important 'Uric acid' in living cells by a new fluorescent '*turn-on*' probe along with quantum chemical calculation

Authors: Chanda Kumari, Dibyendu Sain, Swapan Dey

PII: S0925-4005(18)30455-6
DOI: <https://doi.org/10.1016/j.snb.2018.02.170>
Reference: SNB 24265

To appear in: *Sensors and Actuators B*

Received date: 20-12-2017
Revised date: 21-2-2018
Accepted date: 23-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highly selective and safe ‘*in vitro*’ detection of biologically important ‘Uric acid’ in living cells by a new fluorescent ‘turn-on’ probe along with quantum chemical calculation
