

## Accepted Manuscript

Title: Development of a third generation biosensor to determine hydrogen peroxide based on a composite of soybean peroxidase/chemically reduced graphene oxide deposited on glassy carbon electrodes

Authors: César Horacio Díaz Nieto, Adrian Marcelo Granero, Jimena Claudia López, Gastón Dario Pierini, Gustavo Javier Levin, Héctor Fernández, María Alicia Zon

PII: S0925-4005(18)30372-1  
DOI: <https://doi.org/10.1016/j.snb.2018.02.094>  
Reference: SNB 24189

To appear in: *Sensors and Actuators B*

Received date: 15-8-2017  
Revised date: 22-1-2018  
Accepted date: 11-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Development of a third generation biosensor to determine hydrogen peroxide based on a composite of soybean peroxidase/chemically reduced graphene oxide deposited on glassy carbon electrodes**
