Title: A highly sensitive and selective near-infrared fluorescent probe for imaging hydrazine in living tissues and mice

Authors: Shen Wang, Siyue Ma, Jidong Zhang, Mengyao She, Ping Liu, Shengyong Zhang, Jianli Li

PII: S0925-4005(18)30141-2
DOI: <https://doi.org/10.1016/j.snb.2018.01.126>
Reference: SNB 23975

To appear in: *Sensors and Actuators B*

Received date: 13-12-2017
Revised date: 10-1-2018
Accepted date: 13-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A highly sensitive and selective near-infrared fluorescent probe for
imaging hydrazine in living tissues and mice

Graphical Abstract

Highlights

- A NIR fluorescent probe CyO for detection of hydrazine was reported.
