Title: Using high-energy phosphate as energy-donor and nucleus growth-inhibitor to prepare carbon dots for hydrogen peroxide related biosensing

Authors: Na Li, Shi Gang Liu, Jiang Xue Dong, Yu Zhu Fan, Yan Jun Ju, Hong Qun Luo, Nian Bing Li

PII: S0925-4005(18)30321-6
DOI: <https://doi.org/10.1016/j.snb.2018.02.051>
Reference: SNB 24146

To appear in: *Sensors and Actuators B*

Received date: 8-10-2017
Revised date: 4-2-2018
Accepted date: 6-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Using high-energy phosphate as energy-donor and nucleus growth-inhibitor to prepare carbon dots for hydrogen peroxide related biosensing
