Title: Nanostructured indium tin oxide electrodes immobilized with toll-like receptor proteins for label-free electrochemical detection of pathogen markers

Authors: Donghai Lin, Kenneth D. Harris, Nora W.C. Chan, Abebaw B. Jemere

PII: S0925-4005(17)32054-3
DOI: <https://doi.org/10.1016/j.snb.2017.10.140>
Reference: SNB 23444

To appear in: *Sensors and Actuators B*

Received date: 11-8-2017
Revised date: 20-10-2017
Accepted date: 24-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Nanostructured indium tin oxide electrodes immobilized with
toll-like receptor proteins for label-free electrochemical
detection of pathogen markers**
