Title: A new biosensor based on the recognition of phages and the signal amplification of organic-inorganic hybrid nanoflowers for discriminating and quantitating live pathogenic bacteria in urine

Authors: Yuxia Li, Guoming Xie, Juhui Qiu, Dandan Zhou, Dan Gou, Yiyi Tao, Yi Li, Hui Chen

PII: S0925-4005(17)32286-4
DOI: <https://doi.org/10.1016/j.snb.2017.11.155>
Reference: SNB 23649

To appear in: *Sensors and Actuators B*

Received date: 30-5-2017
Revised date: 21-11-2017
Accepted date: 24-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
