

## Accepted Manuscript

Title: In-situ generated molecularly imprinted material for chloramphenicol electrochemical sensing in waters down to the nanomolar level

Authors: Ana R. Cardoso, Ana P.M. Tavares, M. Goreti F. Sales

PII: S0925-4005(17)32016-6  
DOI: <https://doi.org/10.1016/j.snb.2017.10.114>  
Reference: SNB 23418

To appear in: *Sensors and Actuators B*

Received date: 30-7-2017  
Revised date: 16-10-2017  
Accepted date: 19-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**In-situ generated molecularly imprinted material for chloramphenicol  
electrochemical sensing in waters down to the nanomolar level**
