Title: A physically transient and eco-friendly distributed feedback laser chemosensor for detecting acid vapor

Authors: Muhammad Umar, Kyungtaek Min, Sunghwan Kim

PII: S0925-4005(17)31813-0
DOI: <http://dx.doi.org/10.1016/j.snb.2017.09.147>
Reference: SNB 23238

To appear in: *Sensors and Actuators B*

Received date: 1-6-2017
Revised date: 19-9-2017
Accepted date: 21-9-2017

Please cite this article as: Muhammad Umar, Kyungtaek Min, Sunghwan Kim, A physically transient and eco-friendly distributed feedback laser chemosensor for detecting acid vapor, *Sensors and Actuators B: Chemical* <http://dx.doi.org/10.1016/j.snb.2017.09.147>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A physically transient and eco-friendly distributed feedback laser chemosensor for detecting acid vapor

Highlight

- A chemosensor using physically transient DFB laser platform is prepared.
- The sensor is used to effectively detect HCl vapor with various concentrations.
- The sensor can be washed without pollution and reused by re-coating silk bio-ink.
