Title: Synthesis of imidazole-functionalized silicon quantum dots as “off-on” fluorescence probe for highly selective and sensitive detection of L-histidine

Author: Wang Jiajia Li Ruiyi Long Xiaohuan Li Zaijun

PII: S0925-4005(16)31019-X
DOI: <http://dx.doi.org/doi:10.1016/j.snb.2016.06.157>
Reference: SNB 20483

To appear in: *Sensors and Actuators B*

Received date: 11-2-2016
Revised date: 27-6-2016
Accepted date: 28-6-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Synthesis of imidazole-functionalized silicon quantum dots as “off-on”
fluorescence probe for highly selective and sensitive detection of L-histidine**
