Title: Visual chiral recognition of mandelic acid enantiomers with L-tartaric acid–capped gold nanoparticles as colorimetric probes

Author: Guoxin Song Chunli Xu Baoxin Li

PII: S0925-4005(15)00464-5
DOI: <http://dx.doi.org/doi:10.1016/j.snb.2015.03.109>
Reference: SNB 18317

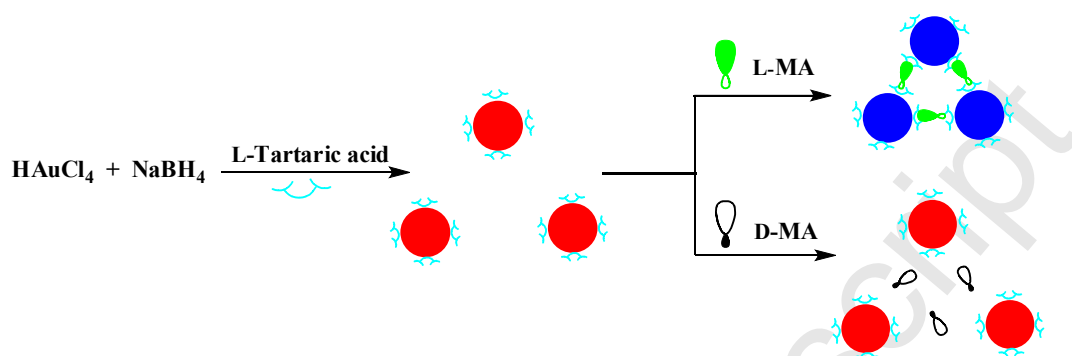

To appear in: *Sensors and Actuators B*

Received date: 20-1-2015
Revised date: 14-3-2015
Accepted date: 17-3-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstracts

Used L-tartaric acid-capped gold nanoparticles as probes, a low-cost, facile and sensitive method for visual chiral recognition of mandelic acid was suggested.
