Title: Pasting of maize and rice starch after high pressure processing: Studies based on an acoustic wave sensor

Author: Mauro D. Santos Jorge A. Saraiva M. Teresa S.R. Gomes

PII: S0925-4005(14)01496-8
DOI: <http://dx.doi.org/doi:10.1016/j.snb.2014.11.110>
Reference: SNB 17751

To appear in: *Sensors and Actuators B*

Received date: 30-9-2014
Revised date: 20-11-2014
Accepted date: 21-11-2014

Please cite this article as: M.D. Santos, J.A. Saraiva, M.T.S.R. Gomes, Pasting of maize and rice starch after high pressure processing: studies based on an acoustic wave sensor, *Sensors and Actuators B: Chemical* (2014), <http://dx.doi.org/10.1016/j.snb.2014.11.110>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Gelatinization of pressure treated starches studied with an acoustic wave sensor
- Gelatinization of native and high pressure treated starches was compared
- Two starches of different biological origin (maize and rice) were compared
- The acoustic sensor was sensitive to changes between close processing temperatures
