An adaptive cell-based domain integration method for treatment of domain integrals in 3D boundary element method for potential and elasticity problems

Qiao Wang , Wei Zhou , Yonggang Cheng , Gang Ma ,
Xiaolin Chang , Qiang Huang

PII: S0894-9166(16)30075-1
DOI: [10.1016/j.camss.2016.08.002](https://doi.org/10.1016/j.camss.2016.08.002)
Reference: CAMSS 10

To appear in: *Acta Mechanica Solida Sinica*

Received date: 6 April 2016
Revised date: 9 August 2016
Accepted date: 29 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**An adaptive cell-based domain integration method for
treatment of domain integrals in 3D boundary element method
for potential and elasticity problems**
