

## Accepted Manuscript

Re-print of Well-balanced methods for the shallow water equations in spherical coordinates

Manuel J. Castro, Sergio Ortega, Carlos Parés

PII: S0045-7930(18)30156-7  
DOI: [10.1016/j.compfluid.2018.03.052](https://doi.org/10.1016/j.compfluid.2018.03.052)  
Reference: CAF 3813

To appear in: *Computers and Fluids*

Received date: 7 March 2017  
Revised date: 10 August 2017  
Accepted date: 27 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Proper formulation of the shallow-water equations in spherical coordinates.
- High order well-balanced finite volume scheme.
- Simulations of planetary waves and/or tsunami waves.
- A parallel implementation using GPUs has been performed.
